

Bed

Lower the two legs to the down position

Press the button on base of table which allows you to push it down.

The fill in pieces (arrowed) are stored in the Garage and Wardrobe and locate into holes in the seat bases. Fit the seat pad where the passenger's legs go

Bed

The additional Plywood piece sits on its own rubber mat and lives in the base of the garage

Bed

Remove the rear passenger's seat back which can be placed on the driver/passenger seats

Add the beige cushions as shown and place the mattress topper on before making the bed

When lowering the dropdown bed, it will be stopped by the blocks in the runners causing it to tilt, raise it to level and the step ladder will hook over the edge. The net is under the mattress and clips to D-hooks, if difficult to clip, raise the bed a bit. The net can be left attached when the bed is lifted.

Bed

When unmaking the bed, you may need to store the drop down leg before you can raise the table as the table needs to be pushed down before it will lift.
